

VIRTUOSE 6D TAO™

The Virtuose 6D TAO is a 6 active degrees-of-freedom haptic device with a passive gripper. Thanks to its large workspace, interaction capacities and EtherCAT interface, it enables and eases a slave robot control.

Nuclear Teleoperation # Industrial Teleoperation

6 ACTIVE DEGREES-OF-FREEDOM – PASSIVE GRIPPER

- ✓ Passive weight balancing
- ✓ EtherCAT/Ethernet communication system
- ✓ TREQ Handle (TeleRobotic Ergonomic Handle), designed for Master – Slave operations, including a dead-man function
- ✓ Button Box: 4 dedicated buttons with switch to freeze the pinch
- ✓ Reduced weight, allowing transportation without specific equipment
- ✓ Dedicated plug-ins for: Unity3D™, 3DExperience™, Catia™ & Delmia™ V5, Solidworks™, Siemens Tecnomatix™ & Classic Jack™
- ✓ Drivers (binary and/or source code) available for: Python™, Worldviz Vizard™, ROS™, CHAI3D™, ODE™, Matlab Simulink™, Nvidia Flex™, ...

MODULARITY

The user takes hold of the haptic device using a gripper or handle placed at the tip (called “end-effector”). The gripping tool is equipped with two buttons, one 3 position-button and a 7th DOF with a passive gripper. The button box is equipped with three buttons and three multiple-position buttons.

TECHNICAL

Translation workspace	1330 x 575 x 1020 mm
Rotation Workspace	330° x 130° x 270°
Translation force: Peak, Continuous	34 N , 9.5 N
Rotation force: Peak, Continuous	5 Nm , 1.4 Nm
Position resolution	0.013 mm
Rotation resolution	0.0018 °
Device Weight	12 kg

ELECTRICAL

Power supply	100-240 VAC 50/60Hz single phase
Consumption	Average consumption 200W Max consumption: 540W

SOFTWARE

Maximum translation stiffness	2000 N/m
Maximum rotation stiffness	40 Nm/rad
Update Rate	1000 Hz

The Virtuose 6D, Virtuose 6D TAO and Virtuose 3D are also available upside-down. We are available to discuss with you any specific request for integration.
